At the Kawartha Pine Ridge District School Board we believe in the power of public education. We contribute to public confidence in education through our transparent and accountable practices, and embrace our role as advocates for the best life choices and life chances for students. I take this opportunity to write to you as the Director of Education of the Board, to contribute to the Ministry of Education consultation regarding the increase in secondary class size averages.

I would like to highlight that our board is of medium size in relation to others in the province, with distinct rural and urban regions. We continue to graduate many students in college and university streams, and into the world of work, and we are fortunate to have developed several key partnerships with Fleming, Durham and Loyalist Colleges, as well as Trent University and Ontario Tech University.

In support of the new government direction for school boards to attain a 28:1 secondary class size average over four years, our senior team has worked diligently over the last few months to implement this change, and to support secondary school teams in making the best choices for students. Although we will have staff redundancies this year (currently the loss of 25 teachers), our broader challenge is the immediate and long-term impact this ratio will have in limiting pathways and learning experiences for students, which ultimately will negatively impact student achievement.

Data from each secondary school in our district has been used to inform this submission, and is attached for your review. Across our schools, a central fact has become immediately clear: as a result of the new class size mandate, we are now cancelling or combining many classes, in turn limiting opportunities for students.

Please find below associated thoughts with respect to secondary planning and pathways to success:

- Timetabling is now a challenge in our ability to offer choice for students.
- Some courses will have to be offered in alternating years and, therefore, students will be limited to specific courses for planning for college or university.

- There is now limited ability to offer mandatory requirements (chemistry, physics, etc.) for entry into specific post-secondary programs.
- There will be career planning limitations. We believe it is important for students to have opportunities to involve themselves in specialized programming that would support them in their career planning.
- There is a significant impact on trade-related courses that require lower enrolment and, therefore, these courses will be less available for, and accessible to, students.

•

A secondary challenge is the diminished quality of learning experiences for students. As schools are forced to combine classes to meet the new class size averages, we will experience the following impacts:

- Small and rural secondary schools will continue to experience the greatest impact of reduced options for students.
- Multi-grade/multi-level classes will be the increasing reality for many schools. This potentially results in as many as three different grade levels (Grade 9, 10 and 11), or combined programming streams (Academic, Applied and/or Locally Developed) within the same classroom.
- A number of different curriculum expectations will be combined in one class.
- Larger classes will include a wider range of abilities, with the teacher required to meet the needs of all students, including a greater number of students who require specific accommodations and modifications.
- We will lose teachers with subject-specific credentials and experience as a result of redundancies and retirement, and will be unable to replace that expertise.
- There will be a reduced number of experiential learning opportunities.
- Credit attainment may be impacted by fewer practical, hands-on experience courses (tech, hospitality), especially for students At Risk of not graduating.
- Specialist High Skills Major (SHSM) programs will be adversely impacted in that required courses that are part of this pathway may no longer be available, resulting in students being unable to attain their Red Seal certification.
- Our ability to honour our obligations within our First Nation Service contracts will become increasingly compromised as we will be hampered in our ability to offer Ojibwe and native language courses.

Though we will continue to work to support the government direction, it is clear through this data that opportunities for students will be compromised as a result of the new directions for secondary class sizes. As we consider the reduced number of course options for students, we recognize that we will not be able to provide the quality of opportunity and outcomes that each student deserves in our Board.

Sincerely,

Jennifer Leclerc
Director of Education
