

# Homework Help

## For Grade 7–10 Math Students

### Dear Parents/Guardians:

If you're a parent worried about how to support your child's math homework questions, don't worry! An exciting online initiative to help students succeed in mathematics is available.

### What is Homework Help?

Homework Help is a great resource offered by the Ministry of Education and the Independent Learning Centre.

Homework Help provides **free, real-time Math** help to students in Ontario publicly funded school boards in Grades 7 - 10. The site offers chat rooms featuring Ontario-certified Math teachers, who work one-on-one with students to help with their specific math questions. Each chat room has a shared whiteboard where both the tutor and the student can draw and write as they work together to develop a solution.

All sessions are recorded, creating a safe online learning environment. Sessions are open to all registered users to watch and learn, including parents/guardians who can create guest accounts. There is no interaction between students and all users are only known by their chosen username.

Homework Help allows students to get help after school hours, when teachers or parents are unavailable to help. It can help students with answering homework questions, reviewing material from previous grades, and studying for test, exams or the EQAO tests.

All that is needed to register is your student(s) Ontario Education Number (OEN—which is indicated on a past report card).

## Ontario Educational Resource Bank

Additional student resources are also available at the Ontario Educational Resource Bank (OERB). This site houses over 21,000 educational resources in diverse subject areas. This site can be accessed at: <https://resources.elearningontario.ca/>
