

Specialized Pathways Programs in Kawartha Pine Ridge District Schools

2014 - 2015

*Clarington Region
Northumberland Region
Peterborough Region*

KAWARTHA PINE RIDGE
DISTRICT SCHOOL BOARD

www.kprschoools.ca

Specialist High Skills Major

SHSM is a program of senior courses, work experience, certification, reach-ahead experience and skill building focused on a specific education and employment area. Students who complete the program receive a Red Seal on their graduation diploma.

SCWI Dual Credit Programs

The School College Work initiative is a partnership program with area colleges. Senior students can earn both secondary school and college credits simultaneously for a dual credit. These programs always involve a teacher from the secondary school and a teacher from the college program.

Advanced Placement

The Advanced Placement Program is a program that offers university level preparation courses at high schools across Canada and the United States.

Articulation Agreements

Some colleges and universities have Articulation Programs that recognize prior learning that occurred in high school. Students may apply for advanced college credit(s) dependent on the program. Each institute has its own procedures for applying so students should contact the college or university, or their high school Guidance Department for more information.

French Immersion

The French Immersion Program enables students to develop proficiency in both French and English. Students who participated in elementary French Immersion programs are able to continue with the program at the secondary school in their area that offers French Immersion.

International Baccalaureate

The International Baccalaureate Program is a challenging two-year program of international education for students aged 16 to 19.

Specialized Arts

Specialized Arts Programs consider one or more areas of the arts as a major instructional focus.

eLearning

eLearning provides students with access to over 100 secondary courses and the flexibility to place a course anywhere in their timetable. These courses follow the precise Ministry-mandated curriculum as do regular face-to-face courses.

Cooperative Education (Co-op)

In the Co-op Program, the Board partners with community businesses, post-secondary education facilities and training organizations to provide experiential learning opportunities. Students earn credits towards their Ontario Secondary School Diploma (OSSD) while learning work skills and training necessary to be successful in an occupation of their choice. Some programs also provide initial apprenticeship training (see OYAP).

OYAP - Ontario Youth Apprenticeship Program

OYAP is a school-to-work program that opens the door for students to explore and work in apprenticeship occupations in Grades 11 and 12.

Centre for Individual Studies

The Centre for Individual Studies is an adult and alternative school which provides a dynamic educational experience in a flexible environment where students and staff together pursue their quest for life-long learning in an atmosphere of cooperation, dignity and mutual respect. Programs include: Credit courses, Literacy and Basic Skills, Dual Credits, Co-operative Education.

Clarington Region

Bowmanville High School

SHSM

- ▶ Arts and Culture
- ▶ Construction
- ▶ Health and Wellness

Specialized Arts

- ▶ Ceramics, Guitar, Music Repertoire, Sculpture and Vocal

Advanced Placement

Advanced Placement
www.ap.ca

Although the Kawartha Pine Ridge District School Board strives to provide students with the opportunity to choose from a wide breadth of programs, the availability of classes and/or programs in any subject is dependent on interest and enrolment.

Where student numbers are not sufficient, schools may be unable to offer courses and programs or may need to do so by combining classes, grades, levels and even subjects.

Career Cruising

All students from Grades 7 to 12 are required to maintain an Individual Pathways Plan (IPP), and to review and update their IPP at least twice a year. Information on careers, colleges and university programs, job-search and resume-building tools are some of the useful features of Career Cruising, the web-based tool that forms the basis of the IPP. www.careercruising.com

Ontario Skills Passport

The Ontario Skills Passport (OSP) provides clear descriptions of Essential Skills and work habits important for success in work, learning and life. Learners can use the OSP tools and resources to access, build, document and track their skills in classroom, cooperative education and other experiential learning opportunities, volunteer and extracurricular activities.

Students can:

- Compare their skills to those required in occupations of interest
- Practice and develop skills using real workplace activities
- Create a resume, covering letter and prepare for a job interview
- Use the OSP Tracker as part of their Annual Education Planning process
- Get quick access to education, training and employment information.
